

Investment Objective Achieving long-term capital growth in real terms and steadily increasing income. Our aim is to achieve a higher rate of total return than the FTSE Actuaries All-Share Index Total Return through investing in a diversified portfolio of stocks.

Fund Managers' Comments

In March, the net asset value (on a cum income basis with debt at fair value) rose 6.2% while the FTSE All-Share benchmark increased by 4.0%.

One of the largest positive contributors to relative performance was Hammerson, a retail property company. The shares rose on optimism about the reopening of stores in the UK and a lower likelihood of the company requiring another capital injection. Among the worst performers was renewable energy company Simec Atlantis Energy, which is aiming to convert a coal plant in Wales to one that uses waste pellets. This is an ambitious project and the timeline for reaching final sign off for the project continues to be uncertain. It remains a small percentage of the aggregate portfolio.

During the month, we initiated a position in Plant Health Care, a company that offers products that increase the yield on crops using environmentally friendly solutions. We sold our position in Vivendi, a media company, to take profits after a period of strong performance.
